Projects

Isles Of Aether – 2023 Shawnee State

January 2023 – Present

- Project manager to ensure a group of 6 artists and 11 engineers stay within scope and timeline for a successful development of the game.
- Created multiple systems that the player and enemies can both utilize to improve productivity of distinct features.
- Handled all aspects of a melee combat system that allows for smooth sequencing of attack animations.
- Developed an auto builder for the game to improve QA testing.

Cowboy Defense Force – 2023 Epic Mega Jam

September 2023

- Aided in creating network base multiplayer.
- Created a player revive system for multiplayer interactions.
- Handled shooting, reloading, and swapping for all the players weapons.
- Modified various models to create distinct models and animations.

Delve – 2022 Shawnee State Game Jam

September 2022 – October 2022

- Utilized the Godot Engine and GDScript to design a challenging platformer while incorporating the given theme of deception.
- Assumed the role of lead and directed a team of nine to produce a functional game within a 7-day period.
- Designed multiple mechanics from collectibles to omnidirectional moving platforms that can be easily manipulated by the level designer.

Critters – 2022 Shawnee State

October 2022

- Assigned the task of making a simple shooter-style game in the Unreal Engine but pursued an ambitious VR horror game that met the requirements.
- Developed aspects of noise detection through blueprints that will give the player the feeling that their actions will draw the enemies closer to them.
- Incorporated the use of the landscape and foliage tools to create a forest-themed environment to immerse the player further.
